

Report, analyse and respond with CS Incident

A module of the powerful IntegralCS system, CS Incident allows organisations to report, analyse and react to issues across the disciplines of safety, environment, quality assurance and business management.

Requiring only basic computer skills for report entry, CS Incident has the power to support processing workflows, root cause analysis, risk management and action allocation and tracking. A feature of CS Incident is a detailed capability, allowing OHS professionals to identify and react to trends in data, while providing management level outputs suitable for monthly reporting.

BENEFITS MEAN BETTER BUSINESS CS Incident specific benefits, include:

- Issue Categorisation** covering incident, near miss, hazard, ncr, suggestion and complaint
- Data Capture** including people, photos, business and project information and contractor details
- Environmental Records** with detailed aspects and impacts, spills, flora and fauna
- Configurable Notifications** to trigger alerts as information is entered
- Action Tracking** with full management steps to resolve issues and ensure compliance
- Processing and Approvals** with defined responsibilities - approval and processing workflow
- Injury Details** including classification, treatment
- Full Statistics** allowing LTIFR, MTIFR, MIFR, TRFR plus analysis
- Integration** with other Integral CS modules

Case Study:

CS Incident and

"Combined with our Triple Certified Management System, Aeramix uses IntegralCS to efficiently manage our sites and projects and to communicate with our clients. IntegralCS allows us to compete with larger companies in our market, and adopt industry best practise using a cost effective system that scales and grows with our business. We have made some really excellent decisions over time that have stood out from the rest. Using IntegralCS is up there with the best."

Cole Harvey, Director
Aeramix

About the project...

CRUSE Partnership Australia delivered an integrated solution to Aeramix consisting of professional services to develop and implement their management system, and IntegralCS as a deployment mechanism to make the solution accessible, sustainable and scalable over any number of projects and sites.
