

Risk

practical | essential | sustainable software

Create and control multiple registers with CS Risk

A module of the powerful IntegralCS system, CS Risk allows you to create a Master Risk Register that gives your team the ability to centrally manage a core set of Risks for your business.

Typically, these Risks use templates to generate project, site and process specific Risk Registers. Each individually managed Template allows a business unit, function or project type to generate multiple Risk Registers.

Every new Risk Register is created from the current Master Risk Register and you can create and manage multiple integrated Risk Registers.

BENEFITS THAT GIVE YOU GREATER CONTROL OF YOUR RISK MANAGEMENT

CS Risk specific benefits, include:

Control create and manage multiple project and site risk registers

Consistency the Master Risk Register ensures the structure and format of information

Centrality from one location simultaneously monitor Risks across your whole business

Information for informed decisions through reporting, analysis, improvement and feedback tools

Compliance to ISO31000 using intuitive initial and residual risk scores

Integration with other Integral CS modules

Case Study:

CS Risk

"IntegralCS is a core part of how we manage health, safety and the environment within our business. The system has the features and functionality that we and our clients require, while maintaining a focus on ease of use that is critical to ensuring effective implementation and adoption within our team. Georgiou is committed to remaining an industry leader in our field, and IntegralCS is a key part of that strategy."

Peter Grant-Smith,
Group Health, Safety, Environment & Quality Manager,
